PROFESSIONAL SUMMARY

Full-stack developer and Computer Engineering student with experience shipping production web apps at a live product studio and as a freelancer. Skilled in owning features end-to-end across React/Next.js, TypeScript, PostgreSQL, and on-device AI, and delivering under real client deadlines.

PROJECTS

GetCited github.com/harsh4k/Getcited

AI search optimization platform that improves citation readiness across AI assistants.

- **Hackathon Win:** 1st at NamasteDev Hackathon 2026; AEO/GEO platform that scores how likely 5 assistants (ChatGPT, Gemini, Claude, Perplexity, Copilot) are to cite a site.
- **Audit Pipeline:** Next.js + Supabase crawls return 2 scores and a prioritized fix list across 5 layers (metadata, schema, HTML, crawlability, structured data), plus CLIP + DeepGaze saliency.

Bunny OS github.com/harsh4k/Bunny-OS

Local desktop voice assistant for Windows and macOS with packaged on-device AI.

- **Desktop Release:** Shipped v0.3.4 on 2 platforms (Windows MSI + macOS DMG) using Tauri v2, React/TypeScript, Rust, and a Python sidecar so users can install and talk to a local assistant.
- **On-Device AI:** 100% local inference (Ollama + faster-whisper) with 0 cloud APIs/telemetry; risky actions need on-screen confirmation.

Attendoo github.com/harsh4k/attendov1

College attendance system with separate student, faculty, and admin workflows.

- **Role Isolation:** 3 production dashboards (student, faculty, admin) live at attendov1.vercel.app; Auth + RLS so each role only sees its own data.
- **Attendance Loop:** Lectures tracked across 4 states (scheduled to cancelled) with present/absent marking and Zod-validated React/TanStack forms.

Rudo github.com/harsh4k/rudo

Local AI terminal assistant built around Gemma 3 via Ollama.

- **Local Agent:** Gemma 3 (4B) terminal assistant with streaming chat, voice I/O, and persistent memory so it can act locally without a cloud LLM.
- **Tooling:** 5 tools (shell, files, search, notes, timer) + 5 live system signals; note RAG; 8,192-token context on 16 GB RAM.

PROFESSIONAL EXPERIENCE

Synapical

2026 – Present

Junior Developer Intern

- **Production Features:** Ship client-facing Next.js, TypeScript, and Tailwind CSS work inside a live production codebase.
- **Delivery:** Iterate against team conventions on real client projects under production constraints.

Freelance

2025 – Present

Web Developer

- **Client Sites:** Design, build, and deploy production React/TypeScript websites for paying clients.
- **Ownership:** Handle domains, hosting, deploys, updates, and post-launch maintenance end-to-end.

EDUCATION

- **NMIMS University, Mumbai**
B.TECH - Computer Engineering

2025 – 2029
CGPA - 7.72/10

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Python, Java, C, Rust, Node.js, React.js, Next.js, Express.js, Vite, Tailwind CSS, Tauri, Tan Stack, Bun, Html
- **Databases:** PostgreSQL, MongoDB, Supabase, VectorDB
- **DevOps:** Docker, CI/CD, Vercel, Sentry
- **Version Control:** Git, GitHub, GitHub Actions
- **Technologies:** REST APIs, Auth, RLS, GSAP, Motion, Lenis, Three.js, OGL, Postman, Figma
- **Specializations:** Full-Stack Development, Local-First AI, Desktop Apps (Tauri), AEO/GEO
- **Generative AI:** Local LLMs, Ollama, Gemma, RAG, embeddings, CLIP, DeepGaze, multimodal models
