+91 84549 63092 / Mumbai, India

Computer Engineering student and full-stack developer who ships production React and TypeScript apps end to end — from idea and interface design through build, deployment, and the polish afterward. I obsess over clean, maintainable code and interfaces that actually feel good to use, and I learn fastest by taking things apart and rebuilding my own version. Off the clock: space, astronomy, and how things are engineered.

EXPERIENCE

Junior Developer Intern — Synapical

2026 – Present

- Build and ship client web projects in Next.js, TypeScript, and Tailwind CSS.
- Work inside a live production codebase and team conventions on real client-facing features.

Freelance Web Developer

2025 – Present

- Design, build, and deploy production websites for clients in React, TypeScript, and modern tooling.
- Turn stakeholder conversations directly into shipped, working applications.
- Own the full pipeline — deployment, domains, hosting, and post-launch maintenance.

PROJECTS

Velsaro — velsaro.in

Live luxury-perfume e-commerce storefront, built for a client.

- Responsive storefront with authentication, routing, and a reusable component library.
- Integrated Razorpay payments, CMS-driven content, and live error monitoring.
- Ran the full launch — domain setup, deployment, and ongoing updates.

React · TypeScript · Vite · Tailwind CSS · Supabase · Sanity · Razorpay · Vercel · Sentry

NexCart — nexcart-v1.vercel.app

Full-stack e-commerce platform, deployed.

- Mobile-first shopping app with responsive browsing and a modular component architecture.
- Tuned frontend performance and shipped through modern hosting workflows.

React · TypeScript · Vite · Tailwind CSS · Vercel

Rudo — github.com/harsh4k/rudo

Local AI assistant (Gemma 3 via Ollama) with a terminal chat UI.

- Streaming replies, persistent memory, and markdown/code rendering in a custom terminal.
- Agentic tool use — shell commands, web search, file reads, RAG note indexing, and voice I/O.

Python · Ollama · Gemma 3 · nomic-embed-text (RAG)

Shipd

Command-line developer tool built in PowerShell. github.com/harsh4k/shipd

Edith

Python system monitor with real-time CPU / GPU / RAM tracking. github.com/harsh4k/edith

SKILLS

LANGUAGES	JavaScript, TypeScript, Python, Java, C
FRONTEND	React, Next.js, HTML, CSS, Tailwind CSS, Vite
BACKEND & DB	Supabase, PostgreSQL, Node.js (basics)
TOOLS	Git, GitHub, VS Code, Vercel, Figma, Sentry

EDUCATION

B.Tech, Computer Engineering

2025 – 2029

MPSTME, NMIMS University · Mumbai · CGPA 7.72 / 10

HACKATHONS

Smart India Hackathon · Adapt · Adapt 2.0 · Cyber Cypher
